SUMMARY

Motivated Computer Science Engineering graduate with hands-on training in Linux (Red Hat OS), CCNA Networking, Cloud Computing & DevOps. Hands-on exposure to AWS, Docker, Kubernetes, Terraform, Ansible and Maven through training and projects. Seeking an entry-level AWS Cloud Engineer, Cloud Support Engineer, Linux Administrator or DevOps Engineer role.

TECHNICAL SKILLS

• Operating Systems: Linux (Red Hat – User & Admin Basics)
• Networking: CCNA Fundamentals (Routing, Switching, TCP/IP)
• Cloud & AWS: EC2, VPC, IAM, S3, ALB, Auto Scaling, CloudWatch, Route 53, EBS, Security Groups, Rds, Efs, Sns, Nat Gateway, Internet Gateway
• DevOps Tools: Docker, Kubernetes, Terraform, Ansible, Maven, Git,

SOFT SKILLS

Problem-Solving | Critical Thinking | Communication | Teamwork | Time Management | Adaptability | Decision-Making | Attention to Detail

PROFESSIONAL TRAINING

Cloud & Infrastructure Training Program

- Linux (Red Hat OS): File systems, permissions, users & groups, process and package management
- CCNA Networking: OSI & TCP/IP models, IP addressing, subnetting, routing & switching basics
- Cloud Computing + DevOps

INTERNSHIP EXPERIENCE

Cloud Computing Intern | BDreamz Global Solutions Pvt. Ltd. | Feb 2026 – Jul 2026
ROLES AND RESPONSIBILITIES:

- Assisted in deploying and managing cloud infrastructure using platforms such as AWS
- Configured and maintained virtual machines, cloud storage, networking services, and security policies.
- Monitored cloud resources, performed system maintenance, and helped optimize cloud performance and cost.
- Supported Linux server administration, backup and disaster recovery processes, and cloud security best practices.
- Worked with the team to automate deployment processes, troubleshoot cloud-related issues, and maintain technical documentation.

PROJECTS

AWS Three-Tier Web Application

- Designed a **3-tier AWS architecture** using **VPC, public/private/DB subnets, route tables, Internet Gateway, and NAT Gateway** across multiple Availability Zones.
- Configured **Security Groups** to control traffic between the **Application Load Balancer, application server, and RDS database**.
- Deployed a **WordPress application on an EC2 application server** in a private subnet and configured Apache HTTPD, PHP, and database connectivity.

- Created an **Amazon RDS MySQL database**, configured DB subnets, and connected it with the WordPress application.
- Configured **IAM role with AmazonSSMManagedInstanceCore** for secure EC2 instance management.
- Created an **AMI** of the application server and configured a **Target Group and Application Load Balancer (ALB)** for application availability and traffic distribution.
- Configured an **Auto Scaling Group** along with **CloudWatch and SNS** for monitoring and notifications.

AWS EFS Shared Storage.

- Configured **Amazon EFS shared storage** across two Amazon EC2 Linux web servers.
- Deployed **Apache HTTP Server** on Amazon Linux 2023 and mounted EFS using **NFS over TLS**.
- Hosted centralized website content on EFS, allowing both EC2 instances to serve the **same website files**.
- Implemented and verified a **high-availability shared-storage architecture** using EC2, EFS, VPC, and Security Groups.

Early Detection of Cardiac Arrest in Newborns

- Worked on data-driven approaches for early prediction of cardiac arrest.

EDUCATION

B.E. Computer Science Engineering – Dhanalakshmi Srinivasan College of Engineering, Coimbatore |CGPA: 7.2 | 2021–2025

CERTIFICATIONS & TRAINING

Cloud Computing and DevOps – Besant Technologies
